```
# HEADER ####
#
# Version: 2024-08-26
#
# Comparison of signature scores in TCGA-BRCA-RNA-Seq based on
# complete gene list and the subset available in the HTG-Panel
# for the following signature scores:
#
#
# -  onctotypeDX/Recurrence Score surrogate: adapted from genefu (PMID 26607490)
#                 based on Paik 2004 (PMID 15591335)
# -  GGI (Genomic Grade Index): genefu version with 112 genes (PMID 26607490)
#                 based on Sotiriou 2006 (PMID 16478745)
# -  SET-Index: Robust 18-gene predictor from Sinn 2019 (PMID 31231679)
#                 based on Symmans 2010 (PMID 20697068)
# -  Pen335: n335 DEG from paired analysis of 1080 paired pre/post Penelope samples
#                 (Different scores for subclusters of the 335 genes)
#
#
#
#

# FUNCTION Definitions ####
# ***************************************************
#
# Function oncotypedxHTG   ####
#    with "CTSL2" updated to "CTSV"
#    excluding "GRB7"
#
#
# The function oncotypedxHTG is a modified version
# of the oncotypedx function from library genefu
#
# In function oncotypedxHTG the gene symbol "CTSL2" is replaced by the
# current HUGO symbol "CTSV".
#
# In addition the gene "GRB7" (which is not available in HTG-Panel) is
# left out of the algorithm in oncotypedxHTG.
#
# Moreover, the variable "sig.oncotypedx" is replaced by "sig.oncotypedx.htg"
#  --> within this new table "sig.oncotypedx.htg" the gene symbol "CTSL2" is
#   updated to the current HUGO symbol "CTSV" and the row with "GRB7" has
#   been removed.
#
# The scaling and clipping of rsu values in the original function
# from genefu package has been modified in order to adapt the
# distribution of Recurrence Score values from RNA-Seq
# to those from clinical RS data (PMID 32565552)
